

## **Individual Route to registration**

**To accompany your application and the portfolio of two sets of written case notes, we ask you to provide the following:**

A reflective self-evaluation on your development as a homeopath since qualifying (or completing the main part of your professional education in homeopathy).

Please relate your self-evaluation to the Core Criteria for Homeopathic Practice (enclosed). We would like you to refer to each criterion and explain how far you are able to demonstrate its fulfilment. References to specific incidents or events to illustrate your experience where relevant will be welcomed. If you feel there are any criteria you have not been able to meet at this stage, show how you might work on these areas in the future.

We do not expect this work to exceed 1,500 words. It should support your application, and if you are invited to interview you will have an opportunity to expand on specific areas with more detail.
