

## **Student Observation List**

### **List of Homeopaths who offer students the opportunity to observe clinics**

As part of its commitment to Continuing Professional Development, the Society is keen to encourage students to take the opportunity to sit in on a clinic session and observe experienced homeopaths in practice. In order to help students to find RSHoms who offer this facility in their local area, we have compiled this Student Observation list.

Practitioners in the following list have agreed to use the Code of Ethics to guide their practice. Copies of the code are available on the website.

Students are recommended to contact the individuals on this list to enquire as to which clinic sessions they are welcome to attend and what costs may be payable to the member running the clinic. All members on this list welcome students in the third or fourth year of their studies to attend and observe their clinic sessions. First and second year students should make individual enquiries to members as to whether they can be permitted to attend.

**Members are listed by county and metropolitan area; their contact details can be found in the Society's online Register: <https://www.homeopathy-soh.org>**
