## Join colleagues and friends in the vibrant city of London for a weekend of stimulating presentations all about men.

Taking place on April 25-26, the conference programme will provide a better understanding of men's lives and illnesses and help practitioners give male patients the confidence to seek homeopathic treatment.

*Over the weekend we will explore philosophically why men, unlike women, suffer from certain diseases. Presentations will include cases and popular remedies along with methodologies applicable to both men and women.*

*In general more women than men seek homeopathic treatment to deal with health issues as well as the day to day challenges of modern life. With around half of the population being male, this is an ideal opportunity for practitioners to explore this particular patient group and in turn expand their homeopathy practice.*

### Plenty to enjoy

Refreshments will be served in the exhibition area and during breaks there will be plenty of opportunity to visit the trade and charity stands from the wider homeopathic community. A vegetarian salad lunch will be served on both days and special diets will be catered for. As a perfect end to the day, after the AGM on Saturday delegates will receive a warm welcome from the Board, staff and speakers at the complimentary drinks reception.

### Saturday night

If you would like to meet up for dinner on Saturday evening visit the Society Facebook event page to make your plans.

#### Timetable

##### Friday

##### Annual Student Conference

– Free to all student members of the Society. Open to all students for a nominal charge.

4.30pm Close

### Ask the Chair & CEO

The Society Chair and Chief Executive will be available over the conference weekend to answer your questions. Please email [pamela\\_stevens@homeopathy-soh.org](mailto:pamela_stevens@homeopathy-soh.org) ahead of the event to arrange a time to meet up at the conference venue.

### 4Homeopathy update

Find out what 4Homeopathy have been doing on your behalf with a short presentation explaining the valuable work of the collaborative from past and present to future campaigns and plans.

# ALL ABOUT MEN

**Nikunj Trivedi (HMAI)**

## Male sexual health: conquering with homeopathy

Sex is an important and vital part of life. It is a state of wellbeing and harmony and allows a man to enjoy sexual activity and reproduction. According to the NHS, it is estimated that 1 in 10 men have a problem related to having sex. Most men experience it at sometime in their life either with physical, psychological, social, domestic, interpersonal or iatrogenic factors influencing sexual health deeply and intensively. Homeopathy brings hope and during 40 years of clinical practice, Nikunj has come across a range of cases with various pathology.

Hormones are a vital factor which play a silent and unseen role unless investigated. Nikunj will share his experience and successful cases which inspired his creation of a repertory on infertility.

### About Nikunj

Nikunj Trivedi (HMAI) began his career as a medically qualified homeopath in 1980 in India. Since 2004 he has run a very busy clinical practice in Leicester with

his wife. Over a career spanning 38 years, Nikunj has treated a wide spectrum of patients from all over the world including infertility and chronic cases by utilising his wide experience of modern medical investigations combined with homeopathic totality to restore abnormal pathology to normal physiology. Nikunj has authored four books on treating fertility problems and chronic diseases and regularly appears in various homeopathy journals. Nikunj wrote and developed the first repertory of infertility and materia medica of sexual disorders which has been integrated into homeopathic software. Nikunj holds lifetime membership of the Homeopathic Medical Association of India (HMAI) and GHMA-India. Nikunj is back following a popular presentation at the Society of Homeopathy's 2018 Conference.

**Bill Rumble RSHom**

## Understanding men: initiation and resonance

Bill Rumble returns to conference by popular demand with a presentation on understanding men via initiation. In Bill's experience asking a male patient how he feels often generates a lack of response accompanied by a mild form of shock followed by a simple request for a treatment for indigestion. The male patient may even be eager to please and respond with a prefabricated emotional testimony that lacks any sense of 'real.' Bill has found it more effective to actually ask the patient 'what happened?' This allows a narrative to unfold which is animated by powerful experiences and enlivened by physical sensations and visualisations. What is being told is a story of initiation, maybe intense and life changing, similar to an earthquake or a flood, or maybe just a small tremor that has rattled the patient. As men we generally experience initiation in the world, outside ourselves, outside our bodies. Bill will look at the dynamics of initiation as an event that alters the 'tunement' of the life force and activates the 'symptom creator' as a communication system. Bill will continue the journey by exploring the concept of resonance; symptoms come from an unknown part of ourselves. Our project in each individual case is to tune in to the 'presence' of the unknown; the realm of the symptom creator; to set up an information channel. To do this we must abandon what we know; about men and women and most of all we must abandon our desire for meaning.

## 2020 Annual conference and AGM

**Dr. Joel Kreisberg**

## Homeopathy and the enneagram: inspiring the practitioner

California-based chiropractor, homeopath and health coach Dr Joel Kreisberg will address the Enneagram – a method of identifying personality types – within a homeopathic context. The Enneagram offers an insightful view of an individual's preferred style of making sense of the world. The nine primordial perspectives of the Enneagram can enhance a practitioner's access to healing wisdom, fostering mutual trust between the healer and the client. Engaging healing that weaves homeopathy and the Enneagram provides a powerful method for increasing an individual's ability for growth and development. Dr Kreisberg will guide participants through a series of learning activities that engage both the personal growth perspectives of the Enneagram with the direct experience of universal homeopathy of inspiring homeopathy. Together, with our intuition and knowledge, we embark on a journey through the nine Enneagram styles. Working with personality themes provides ample opportunity for homeopaths to deeply dive into transformative healing. Joel provides accessible ingredients that can flavour the homeopathic menu with an opportunity to increase healing capacity through self-learning.

### About Joel

Dr. Kreisberg is the executive director of the Telesio Institute, a school of Coaching and Narrative Healing. His unique blend of homeopathy and narrative health coaching offers powerful lasting change. Author of *Coaching and Healing: Transcending the Illness Narrative*, and *The Homeopathic Handbook for Poison Ivy/Oak*, Dr. Kreisberg teaches, lives, and works in Berkeley, CA.

**Discount** - All Society members are eligible for a special discount on conference tickets. See booking information for further details.

### About Bill

Bill Rumble is a homeopath based in south Wales and the founder of the Welsh School of Homeopathy. He has been in practice since 1987 and has taught homeopathy since 1991. Bill has practised and taught homeopathy in a number of countries including Wales, England, Ireland, USA, Czech Republic, Ghana and Kenya. He currently teaches in the Welsh School and is a faculty member at the School of Homeopathy in Stroud.

### About Bob

Bob Blair graduated from the College of Homeopathy in

2001, before going on to train with Jeremy Sherr at the Dynamis School, and then becoming immersed in the Sensation Method, and later the Synergy approach. Bob teaches in the UK and abroad, and has clinics in Cambridge and Nottingham; he is part of the faculty of the School of Homeopathy, Stroud, and a regular online guest lecturer at Rajan Sankaran's The Other Song Academy, Mumbai. Bob delights in synthesising information from a variety of sources and teachers, and in communicating different approaches to case-taking and analysis, adapting the process to suit the individuality of each patient.

### Join the discussion - AGM Saturday 25th April

After the tea break on Saturday afternoon, the Annual General Meeting will take centre stage and ahead of the business of the day, you can join colleagues for a general discussion.

The AGM will include the presentation of the 2019 activities, the annual review and annual accounts.

The AGM part of the day is free to members, but please do let the Society know if you are attending in advance. Minutes and notices together with details of the on-line annual review will be sent out to members ahead of the meeting.

**Dr Yubraj Sharma MFHom**

## Spiritual and traditional chinese medicine perspectives on male reproductive health - the heart and nervous system

### About Yubraj

Dr Yubraj Sharma MFHom completed his medical training in 1991 at Oxford University and King's College Hospital. After a few years in hospital medicine, he trained at the Royal London Homeopathic hospital, qualifying in 1996. He is a member of the Faculty of Homeopathy. Yubraj has a busy private homeopathy practice in Willesden, London and runs the School of Shamanic Homoeopathy as well as teaching astrology and a new course on herbalism. He is the author of four books within the fields of homeopathy, spirituality and meditation. Yubraj has also trained in acupuncture and chinese herbal medicine and uses anthroposophical medicine and philosophy as an integral part of his practice.

Utilising theosophy, anthroposophy and ancient wisdom teachings, a number of esoteric principles underlie the male reproductive anatomy and physiology, for example explaining why the testicles are outside/below the pelvis of the male, and heightening the importance of the blood-testes barrier for healthy sperm production. Traditional chinese medicine and philosophy also highlights the microcosmic orbit for sustaining the reproductive capacity by balancing this with the rest of the endocrine system and head centres. Yubraj will explain the distortions to the male energy field through western allopathic medicine and lifestyle, and esoteric causes of adrenal hypo-androgenism (low testosterone drive). The dynamics of heart physiology with the sacral chakra and the triggering of heart disease with reproductive failure; and the role of the reproductive system in balancing the brain and nervous system will also be explored.

### — Bob Blair LCH PCH

## Burn out and a sense of challenged masculinity

Burn out is an incredibly common phenomenon occurring amidst the myriad demands of modern times, and increasingly so. It can frequently be the patient's chief presenting complaint, but often is not named or recognised as such by the patient, being a syndrome that can manifest in a variety of physiological and psychological symptoms.

Bob will use a case of burn out from his practice to illustrate his current favoured approach to receiving and perceiving cases, based around the concept of mapping each of homeopathy's three main kingdoms in accordance with an 'evolutionary' template. This template refers to the Fundamental Dynamics of Ether, Water, Earth, Air and Fire, mapped out in a specific sequence that reflects the development of the ego as it becomes increasingly well defended.

This case, of a man struggling to live up to all the demands placed on him by his role in this modern and ever-changing world, provides a useful framework by which to view our classical materia medica through a very contemporary lens, combining analysis tools derived from a variety of modern teachers, including Sankaran, Sherr, Gandhi, Yakir and Scholten.
