

SFHCNH17

Prescribe homeopathic treatment for individuals

Overview

This standard is about prescribing homeopathic treatment for individuals. Users of this standard will need to ensure that practice reflects up to date information and policies.

SFHCNH17

Prescribe homeopathic treatment for individuals

Performance criteria

You must be able to:

- P1 evaluate remedies and differentiate between those which are indicated in the case
- P2 select the remedy or remedies which are most appropriate for the individual and the stage of their homeopathic treatment
- P3 select a prescribing methodology appropriate for the individual and consistent with the overall treatment plan
- P4 identify factors which influence choice of potency, dose or form of prescription
- P5 explain the remedy choice and possible responses in an appropriate manner, level and pace
- P6 prescribe the potency, dose and form of remedy most likely to give optimum benefit for the individual given their symptom picture, homeopathic treatment goals and their wishes
- P7 explain to the individual their responsibilities in taking the remedies and encourage them to:
 - P7.1 monitor their condition and response to the remedy
 - P7.2 note any changes in their health and well-being
 - P7.3 contact the practitioner at an appropriate time if they have any concerns or queries in relation to their treatment
- P8 accurately record information on the remedy chosen and the rationale for its choice

Knowledge and understanding

You need to know and understand:

- K1 principles of different prescribing methodologies and their application
- K2 the links between case evaluation and selection of a prescribing methodology
- K3 the connections between the vitality and circumstances of the individual and appropriate treatment planning
- K4 ways of building review, reflection and evaluation into treatment planning
- K5 characteristics of major remedy pictures
- K6 sources of information on less commonly used and new remedies, and how to access and use these resources
- K7 relationships between different remedies and/or classes, groups and families of remedies
- K8 affinities of remedies for particular symptoms, sensations and functions
- K9 possible contra-indications for particular remedies and potencies in particular conditions
- K10 how to interpret, analyse, evaluate and synthesise the patterns and essential characteristics of remedy pictures from materia medica, provings and clinical observation
- K11 the variety of content, structure and approach of different materia medica, and the benefits and limitations of each
- K12 the variety of repertories available, and how to use them, being aware of their relative value and limitations
- K13 principles of selecting remedies - i.e. matching remedy pictures and symptom pictures
- K14 principles of differential diagnosis and remedy selection
- K15 the importance of taking a critical approach in relation to remedy selection
- K16 principles of minimum dose and repetition of dose
- K17 factors to consider when choosing potency and dose tailored to the individual's needs
- K18 remedy actions, reactions and interactions
- K19 terminology and abbreviations used for describing dilutions and potencies
- K20 forms in which remedies are available
